

# REEF ICP TEST

**Charge:** 20068  
**Produkt / Product:** Professional Sea Salt  
 Produktionsdatum / production date: 26.10.20  
 Methode: 39 g/l Salz in Osmosewasser  $\pm$  35 psu analysiert mit ICP-OES (induktiv-gekoppeltes Plasma mit optischer Emissions-Spektrometrie).  
 Method: 39 g/l salt in osmosis water  $\pm$  35 psu analysed using ICP-OES (inductively coupled plasma with optical emission spectrometry).

| Physikalisch-chemische Grundwerte |      | gemessen / measured | Referenzbereich / reference range |
|-----------------------------------|------|---------------------|-----------------------------------|
| Alkalinität / Alkalinity          | dKH  | <b>8,6</b>          | 7,8 - 8,5                         |
| Salinität / Salinity              | psu  | <b>34,3</b>         | 34,5 - 35,0                       |
| pH - Wert / pH - Level            |      | <b>8,34</b>         | 8,2 - 8,4                         |
| Gesamtphosphat / Total Phosphate  | mg/l | <b>0,0013</b>       | < 0,005                           |

## Makroelemente, Kalkhaushalt-Elemente und Halogene / Major elements and halogens in mg/liter (1 mg = 0,001 g)

|  |    | gemessen / measured | Referenzbereich / reference range |
|--|----|---------------------|-----------------------------------|
| Natrium / Sodium                         | Na | <b>10735</b>        | 9500 - 11500                      |
| Schwefel / Sulphur                       | S  | <b>899</b>          | 850 - 950                         |
| Kalium / Potassium                       | K  | <b>413</b>          | 380 - 420                         |
| Bor / Boron                              | B  | <b>4,59</b>         | 3,8 - 5,5                         |
| Magnesium                                | Mg | <b>1317</b>         | 1200 - 1450                       |
| Calcium                                  | Ca | <b>445</b>          | 400 - 440                         |
| Strontium                                | Sr | <b>8,30</b>         | 6,5 - 9                           |
| Iod / Iodine (Gesamt Iod / Total Iodine) | I  | <b>0,078</b>        | 0,055 - 0,08                      |
| Brom / Bromine                           | Br | <b>59,1</b>         | 55 - 75                           |

## Makronährstoffe / Macronutrients in mg/liter (1 mg = 0,001 g)

|                                       |                                    | gemessen / measured | Referenzbereich / reference range |
|---------------------------------------|------------------------------------|---------------------|-----------------------------------|
| Phosphor / Phosphorus (ICP-OES)       | P                                  | n.n.                | < 0,06                            |
| Gesamt / Total Phosphate (calculated) | PO <sub>4</sub> <sup>3-</sup> tot. | n.n.                | - 0,10                            |
| Silicium / Silicon (ICP-OES)          | Si                                 | <b>0,11</b>         | 0,1 - 0,2                         |

## Physiologisch relevante Spurenelemente und farbrelevante Mikronährstoffe / Physiologically relevant trace elements and color-relevant micronutrients in µg/liter (1 µg = 0,000001 g)

|                       |    | gemessen / measured | Referenzbereich / reference range | Bioavailable                                  |
|-----------------------|----|---------------------|-----------------------------------|---|
| Zink / Zinc           | Zn | <b>4,47</b>         | 3 - 8                             |   |
| Vanadium              | V  | <b>4,49</b>         | 2 - 10                            |   |
| Kupfer / Copper       | Cu | <b>1,50</b>         | 2 - 6                             |   |
| Nickel                | Ni | <b>5,83</b>         | 3 - 6                             |   |
| Mangan / Manganese    | Mn | > <b>28</b>         | 0,10 - 0,25                       | Rieselhilfsmittel / Anti-caking agent * 0,015 |
| Molybdän / Molybdenum | Mo | <b>13,55</b>        | 10 - 20                           |   |
| Eisen / Iron          | Fe | > <b>28</b>         | 0,05 - 2,5                        | Rieselhilfsmittel / Anti-caking agent * 0,03  |
| Chrom / Chrome        | Cr | <b>0,13</b>         | 0,05 - 2,3                        |   |
| Cobalt                | Co | n.n.                | 0,02 - 1,9                        |   |

## Sonstige Spurenelemente und potentielle Schadstoffe / Other trace elements and potentially harmful substances in µg/liter (1 µg = 0,000001 g)

|                       |    | gemessen / measured | Referenzbereich / reference range |
|-----------------------|----|---------------------|-----------------------------------|
| Lithium               | Li | <b>194</b>          | 180 - 350                         |
| Barium                | Ba | <b>24</b>           | 20 - 50                           |
| Aluminium             | Al | <b>1</b>            | 5 - 30                            |
| Antimon / Antimony    | Sb | n.n.                | < 10                              |
| Zinn / Tin            | Sn | n.n.                | < 10                              |
| Beryllium             | Be | n.n.                | 0,1 - 1,4                         |
| Selen / Selenium      | Se | n.n.                | 0,9 - 5,5                         |
| Silber / Silver       | Ag | n.n.                | < 10                              |
| Wolfram / Tungsten    | W  | n.n.                | < 30                              |
| Lanthan / Lanthanum   | La | n.n.                | 2 - 10                            |
| Titan / Titanium      | Ti | n.n.                | 0,5 - 3,5                         |
| Scandium              | Sc | n.n.                | 0,1 - 1,0                         |
| Zirkonium / Zirconium | Zr | n.n.                | 1,0 - 2,2                         |
| Arsen / Arsenic       | As | n.n.                | < 1                               |
| Cadmium               | Cd | n.n.                | < 1                               |
| Quecksilber / Mercury | Hg | n.n.                | < 1                               |

\* Rieselhilfsmittel haben keine bioaktive Wirkung, werden durch Abschäumer entfernt / Anti-caking agents have no bioactive effect and are removed by skimmers.

Messwerte vom Typ "> 24" zeigen an, daß die Konzentration oberhalb des kalibrierten Bereiches liegt und sich daher nicht definitiv bestimmen läßt. Angegeben wird in diesen Fällen, wieviel mindestens vorhanden ist (z.B. 24 µg/l). Abkürzungen: n.g. (nicht gemessen), n.n. (nicht nachweisbar).

Measured values of type "> 24" indicate that the concentration is above the calibrated range and therefore cannot be definitely determined. In these cases the highest detectable value is indicated (e.g. 24 µg/l), the actual value may be higher. Abbreviations: n.g. (not measured), n.n. (not detectable).
