

ULTRA PHOS

HOW TO USE ULTRA PHOS

- High purity aluminium-based adsorbent beads for effective filtration of seawater.
- ULTRA PHOS safely removes silicates, undesired trace elements such as barium, arsenic and fluoride as well as phosphorus compounds and phosphates from the water.
- Organic colorants and pollutants are bound and thus the water is purified in the best possible way.
- Nutrient control and clear water easily with ULTRA PHOS.

APPLICATION AND DOSAGE:

- Always be careful when making changes to the aquarium!
- The material can heat up in water!
- Rinse ULTRA PHOS briefly before use.
- **At the beginning** use 50 g per 200 l. **After 14 days** you can increase up to 100 g per 200 l (52,83 US gal.).
- **Check PO₄ concentration regularly**, e.g. with FAUNA MARIN AQUAHOMETEST PO₄.

<https://www.faunamarincorals.de/AquaHomeTest-PO4/20610-VH>

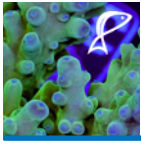

- **If the PO₄ concentration rises again**, replace ULTRA PHOS with fresh material. Do not use more than 100 g per 200 l.

- We recommend using the material in a well-flowed filter chamber or in a fluidized bed filter, where it develops its best effect. When used in fluidised bed filters, it is important to ensure that the performance of the material is significantly increased. In this case, reduce the quantity by 50 % and ensure that the flow rate in the filter is not too fast.

<https://www.faunamarincorals.de/Multifilter/18260-VH>

- ULTRA PHOS should not be used for low PO₄ values (below 0.03 mg/l (0,26 US gal.)) and undetectable NO₃ values..
- ULTRA PHOS is very strong and is used in nutrient rich tanks. At extremely high nutrient levels it may take some time to achieve a measurable PO₄ reduction.
- This is normal, since phosphorus compounds are filtered out first. This is noticeable in the yellow coloration of the material and the significantly clearer water.

**ULTRA
PHOS**

INGREDIENTS:

- 99,8% aluminum-based phosphate media in spherical shape

SAFETY ADVICE:

- Not for human or animal consumption.
- Not to be used for animals intended for food production.
- Do not inhale or swallow.
- **Keep product away from children!**
