

BACTO THERAPY

HOW TO USE BACTO THERAPY

- particularly effective against the accumulation of organic substances and nutrients
- hydrolytic enzymes and special nitrogen bacteria reduce unwanted nutrients
- extremely concentrated mixture of halophilic and probiotic bacteria

BACTO THERAPY

APPLICATION:

- Improves growth and coloration of fish and corals
- fish and corals no smell of sulfur or rotten eggs
- reduces detritus and anaerobic zones
- reduces stress and germ pressure caused by pathogenic germs
- contains no sulfide and no toxic preservatives
- live bacteria, immediate effect after dosing
- highly concentrated: lowest dosing quantities and costs

DOSAGE:

Initial dosage:

- **Day 1- 3: 10 ml per 100 l (26 US gal), then weekly 5 ml per 100 l (26 US gal)**

Continuous dosing:

- **3 ml per 100 l (26 US gal) per week. In aquariums older than two years use max. 30 % of the indicated dosage!**

The best effect is achieved in combination with **FAUNA MARIN BACTO BLEND.**

BACTO BLEND

Fauna Marin Bacto Blend supports the entire nitrogen and nutrient cycle, aquariums are revitalized, new aquariums are run in faster and more stable.
