Messwerte vom Typ "> 24" zeigen an, dass die Konzentration oberhalb des kalibrierten Bereiches liegt und sich daher nicht definitiv bestimmen lässt. Angegeben wird in diesen Fällen, wieviel mindestens vorhanden ist (z.B. 24 µg/l). Abkürzungen: n.g. (nicht gemessen), n.n. (nicht nachweisbar).

Measured values of type "> 24" indicate that the concentration is above the calibrated range and therefore cannot be definitely determined. In these cases the highest detectable value is indicated (e.g. 24 µg/l), the actual value may be higher. Abbreviations: n.g. (not measured), n.n. (not detectable).
